

Agile isn't dead

You're just doing it wrong

KAROLINA OCHLIK

THIS TALK WILL HAVE HOT TAKES.

A LOT...

YOU HAVE BEEN WARNED

THE

OLD DAYS

THE WATERFALL

REQUIREMENTS

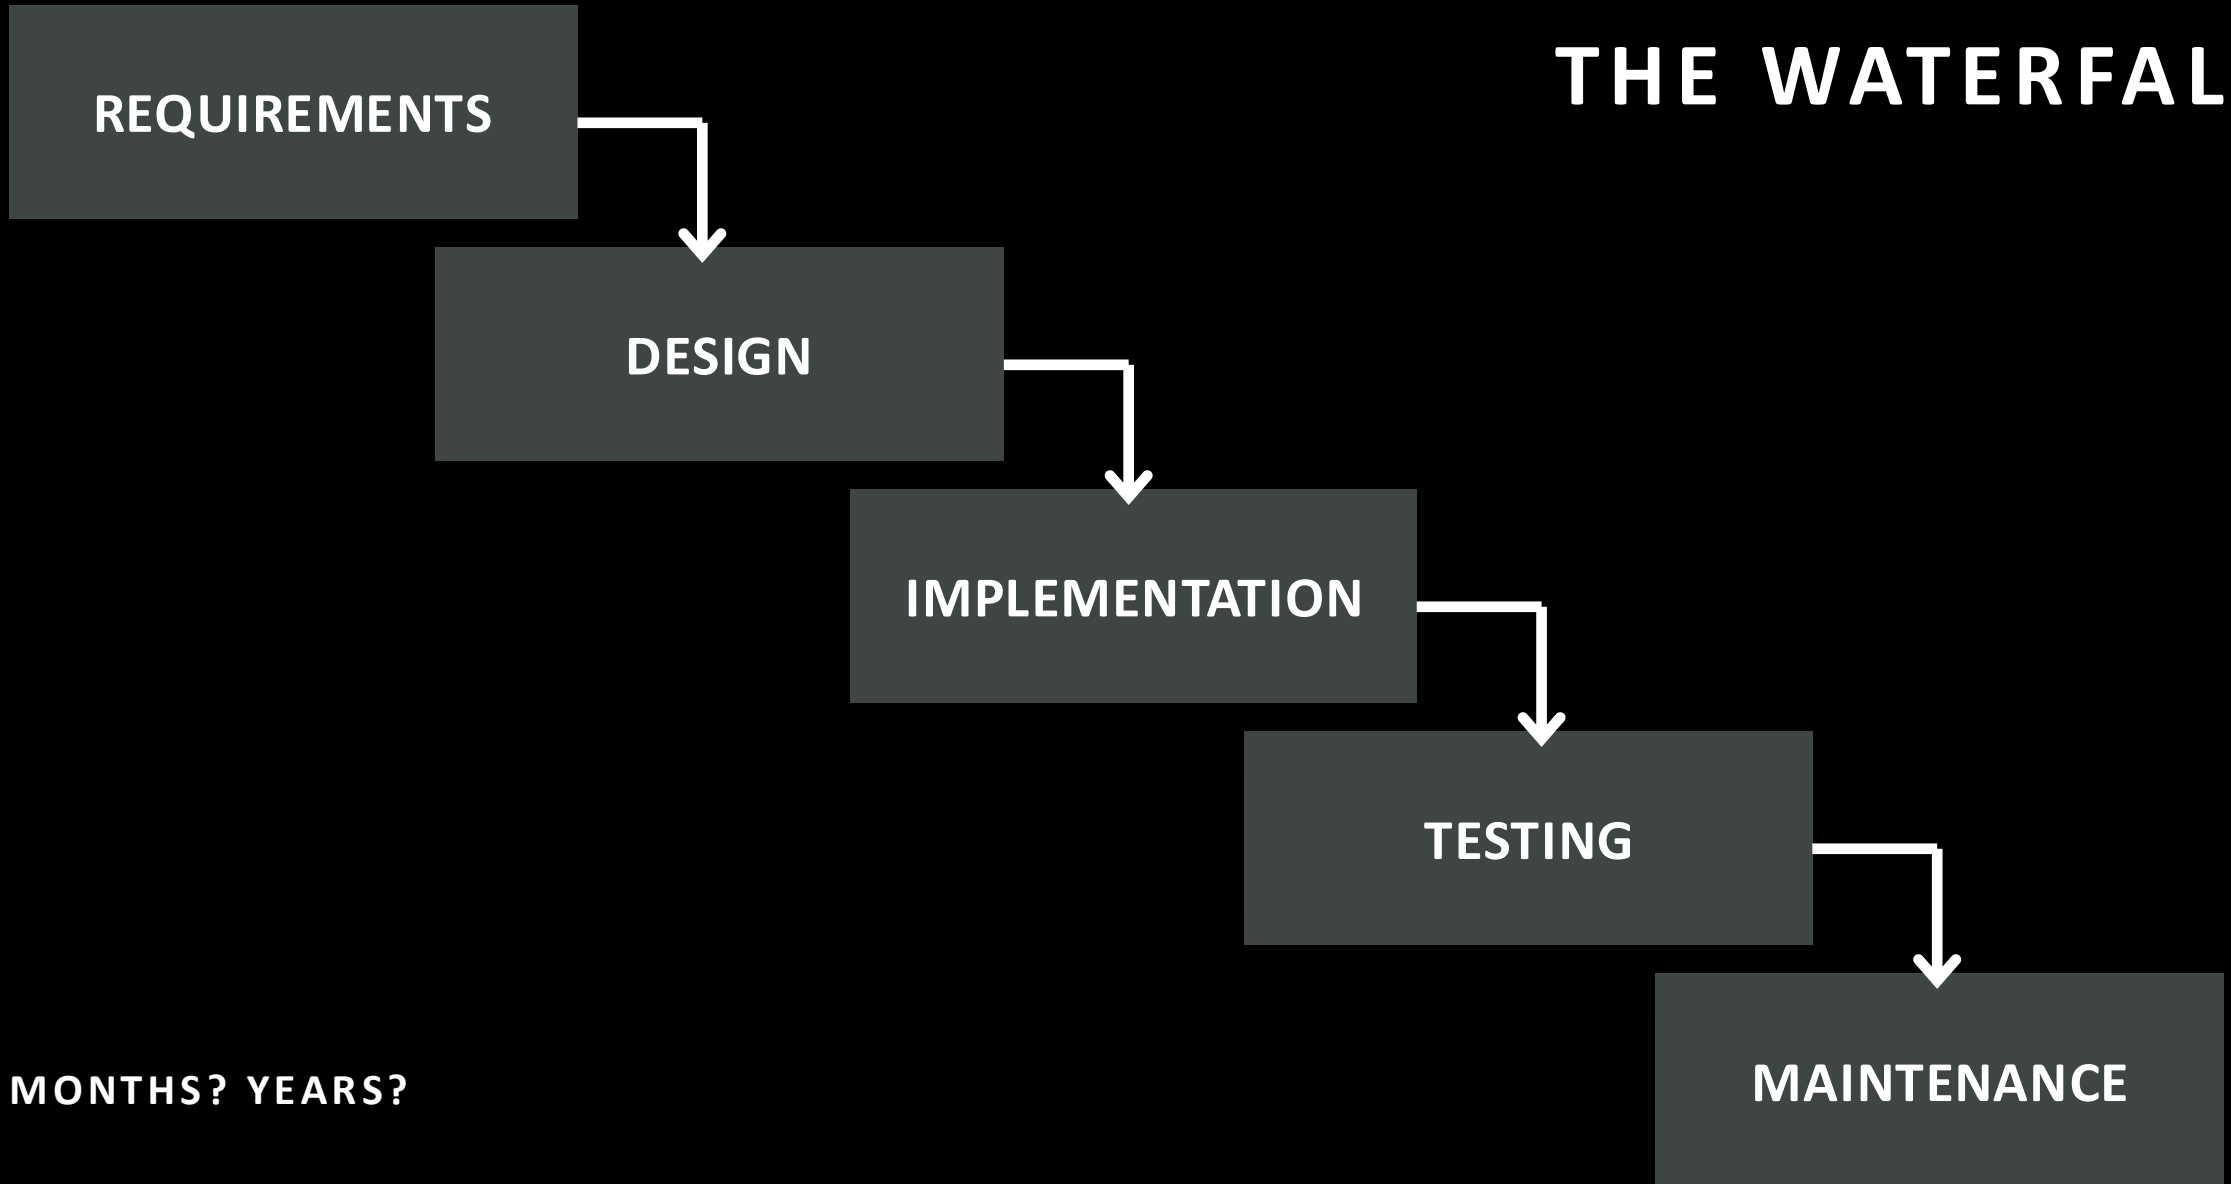

DESIGN

IMPLEMENTATION

TESTING

MAINTENANCE

MONTHS? YEARS?

BUT THEN!

17 absolute mad lads

Ski resort in Utah

The Agile Manifesto

Individuals and interactions over processes and tools

Working software over comprehensive documentation

Customer collaboration over contract negotiation

Responding to change over following a plan

(sorry for censorship :D)

AGILE

AS INTENDED

XP

AGILE

PEOPLE

ADAPTABILITY

FEEDBACK

**EMBRACING
THE CHANGE**

INSPECT & ADAPT

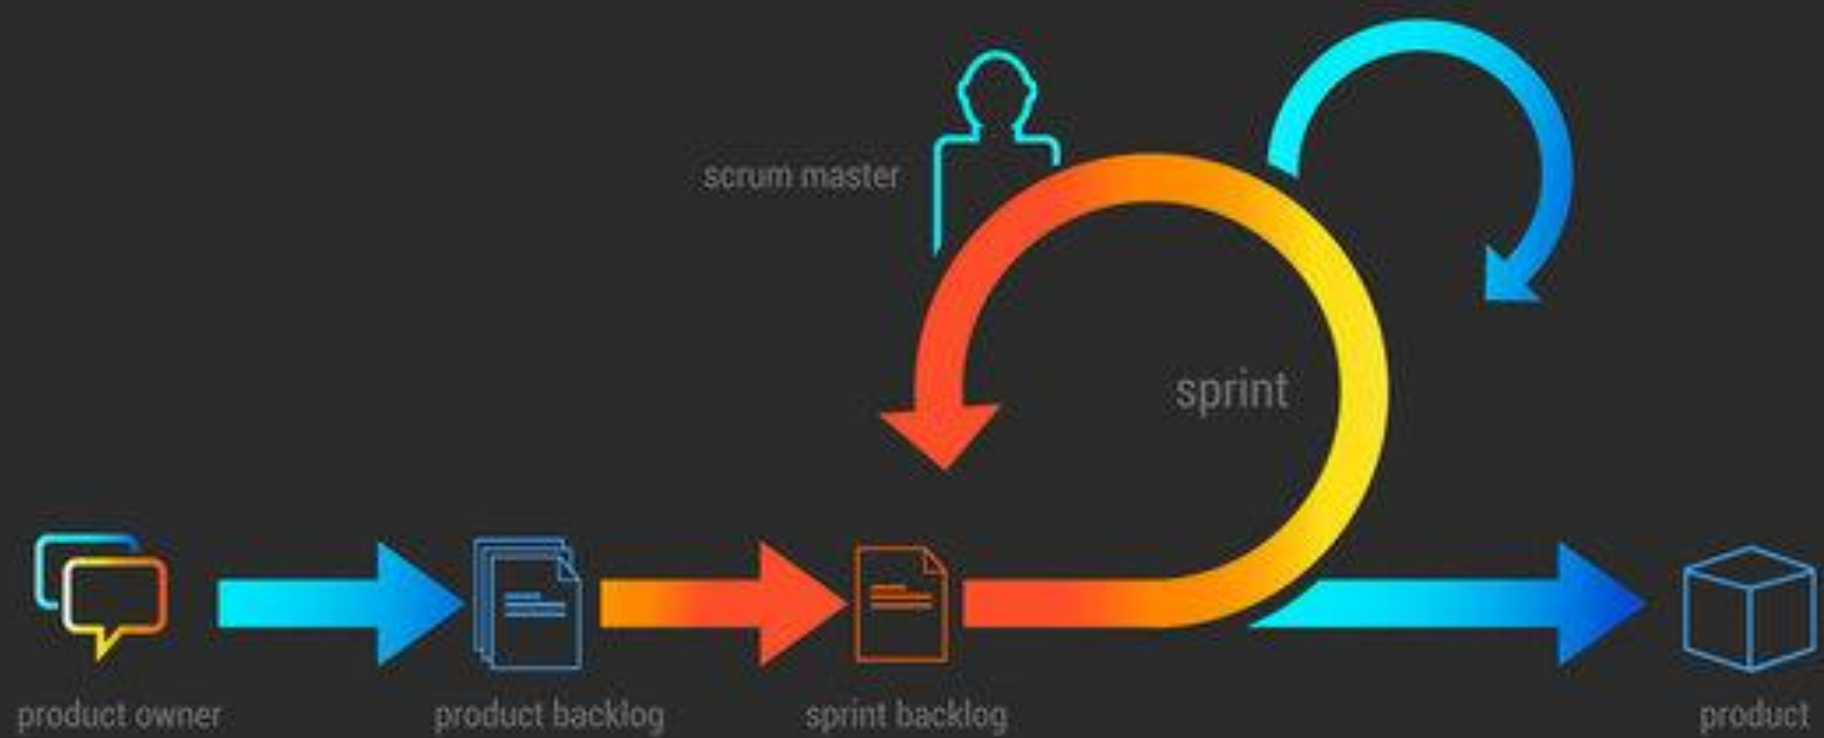

FLEXIBILITY

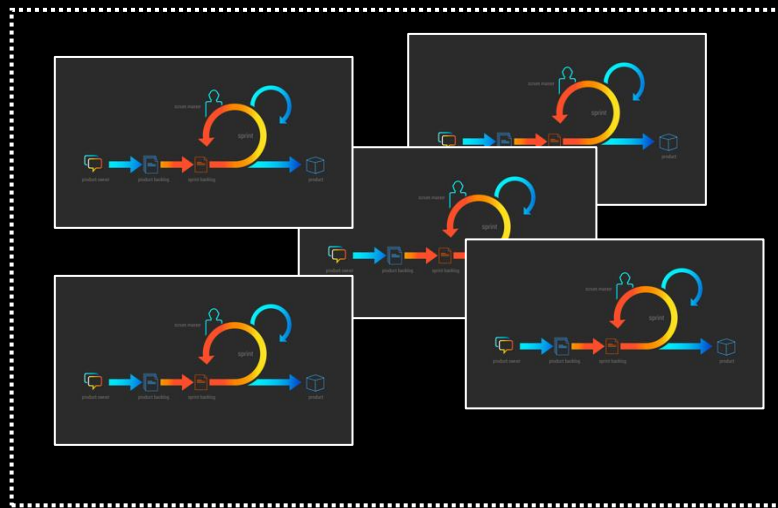

THINK!

RELEASE OFTEN

AGILE

AS IMPLEMENTED

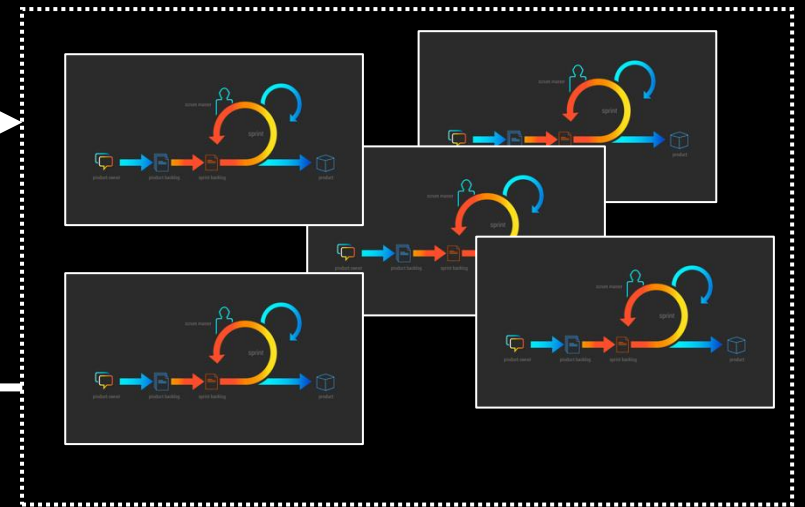

Product 2

You do that!

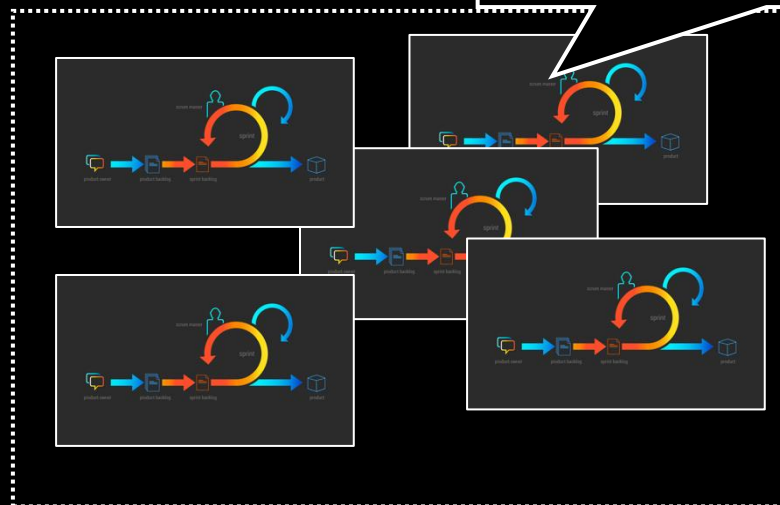

No u

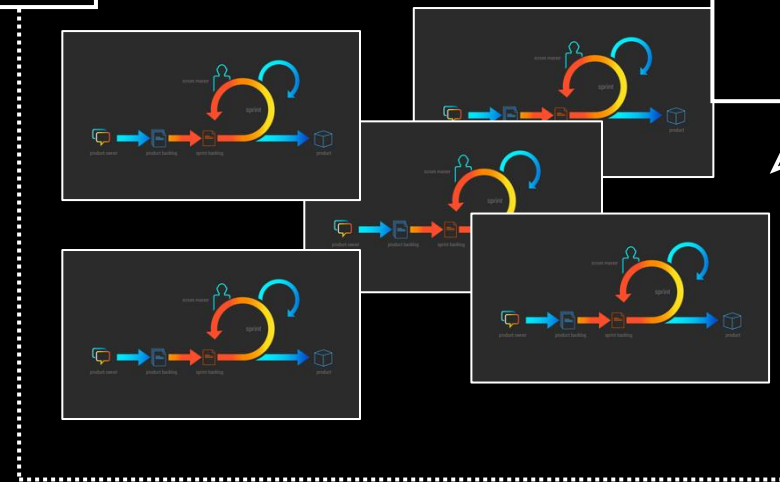

Product 1

Request it through ServiceNow and wait 3 weeks cause our work is planned

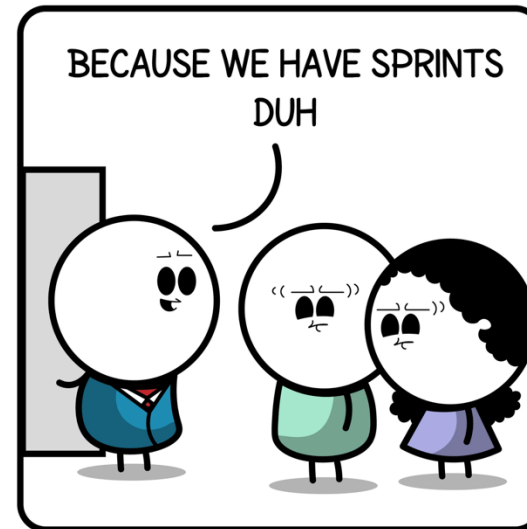

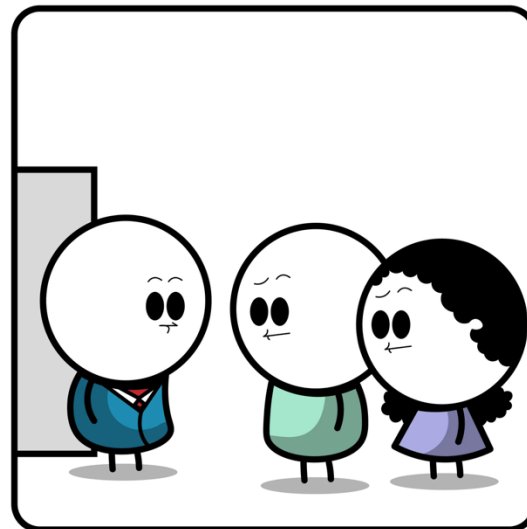

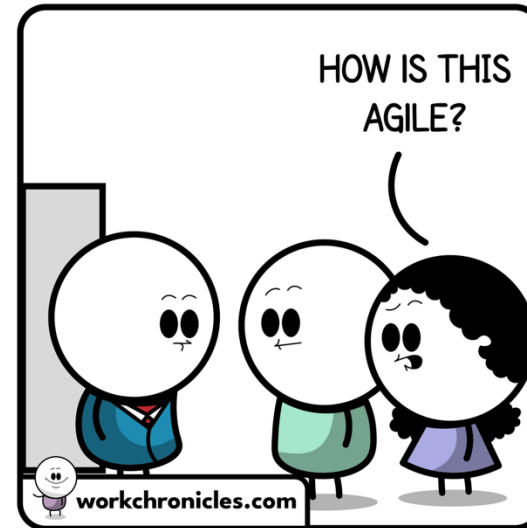

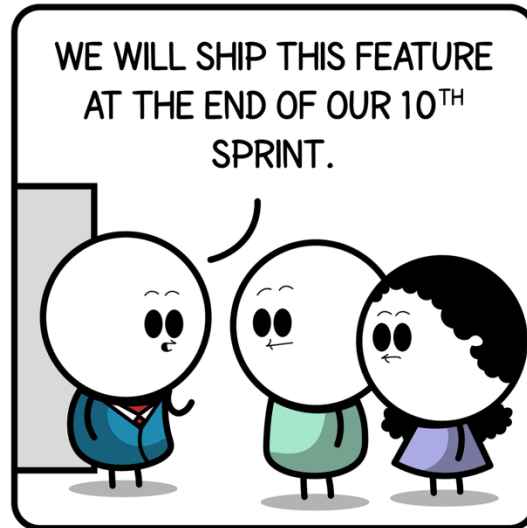

Guys, what about the security?

Some central team that handles Entra

Product 3

Comics about work. Made with ♥ & lots of coffee.

Implementation Roadmap

SPC

Continuous Learning Culture

THERE WAS NO REASON
TO LET IT LAST THIS
LONG AND GET THIS BAD

WHAT THE HELL IS
MY PROBLEM

IN

COMES AI

More features

More APIs

More reviews

More tests

More documentation

More one-shot apps

More = Better?

Review?

SO

WHAT NOW?

User problem

Small assumption

Design & implementation (with AI)

Human & agent review

Small release

Rinse & repeat

Waterfall in sprints is still
waterfall...

...even if you add Agile™ to
it

**Throw away the
backlog**

Work on what your users need
Consult with them as often as possible

D E L I V E R

Refactor (MERCILESSLY)

Power to the people
(role of managers)

Management needs to support the team

Leave the time control to the team

Let them work

Coach or train them if needed

(e.g. cultural differences like Asia)

L I S T E N

Anything that is not bringing value
to users is
WASTE

Example? Scrum meetings

Daily at 11AM

- **15-30 minutes before - focus stops**
- **15-30 minutes meeting**
- **30-60 minutes of regaining focus**

1-2hrs lost because of the 15 minutes meeting

Refinements? Plannings? Retrospectives?

Templates

Shared agents/instructions

Share failures and successes

No more microservices than users

Reuse things

Users do not care about how good well your product is
maintained.

They care about product being “**good enough**”

Applications can become **mature**

Allen Holub @allenholub.bsky.social  @allenholub · 1 Jun 2019

Educating a team slows you down for a week or two. Not educating the team slows you down forever. Time spent in learning is never wasted.
