

CODE EUROPE 2026

PLATFORMS THAT DON'T SUCK

CREATING TOOLS THAT YOUR
TEAMS MIGHT ACTUALLY LIKE

KAROLINA OCHLIK

.....

THERE WILL BE ONLY ONE
SLIDE WITH A LOT OF
TEXT, I PROMISE

THE
EVERYDAY

SELF-SERVICE

you have awoken the
mythical cringe weasel

BUT IT'S A
PLATFORM!

So...

What now?

Who am I?

- Director, Engineering and Products Excellence @AstraZeneca
- Highly-regulated areas (pharma, fintech, telco)
- Leader, consultant, engineer, trainer
- Fan of healthy automation aka LAZY AF

THE
PLATFORM

What is
platform?

Product that
reduces cognitive
and operational
work for people
(not only)

**But Karo ,
how?**

DON'Ts
THE

Assumptions

So...

Many...

Questions...

Mandatory
adoption

THE DÖS

Internal

users

are users

Start small

Use your
tools

Feedback

Measure

What should
platform
have?

Infra

Workflows

Example
code

Agents

Docs

Interface

THE STEPS

As-is?

Platform?

Future?

THE QUESTIONS

Can a new team use platform without experts?

Can common tasks happen without a ticket?

Are defaults safe and useful?

Are errors visible and actionable?

Is the platform faster than the workaround?

Can teams see what the platform is doing?

Is there a clear owner when it fails?

Can teams leave the paved road when needed? (new things)

Does documentation match reality?

What happens when the platform is unavailable?

Thank you!
